

KHMS Digital Tools — Quantifiable Impact Summary

GBS HC 2026 + OpEx Survey | Kraft Heinz GBS | 2026

What Was Built

Deliverable	Description
GBS HC 2026	Power App for monthly KHMS Health Check assessments across all towers
OpEx Survey App	Power App for Manager and Member operational excellence perception surveys
Submission Tracker	Real-time screen showing which teams have/haven't submitted per month
SharePoint Infrastructure	5 structured lists replacing manual Excel/email workflows
User Manual (PPT)	17-slide stakeholder-ready guide covering both apps

1. TIME SAVED — GBS HC 2026 (Health Check App)

Per Submission (One Team, One Month)

Activity	Old Manual Process	New App Process	Time Saved
Opening/finding correct Excel template	5 min	0 min	5 min
Filling in Tower, Team, Month headers	3 min	30 sec (dropdowns)	2.5 min
Answering 10 tools × 5–8 questions	30–45 min (scattered files)	15–20 min (single guided wizard)	15–25 min
Saving and emailing to consolidator	5 min	0 min (auto-saves to SharePoint)	5 min
Total per submission	43–58 min	16–21 min	~27–37 min saved

Monthly Across All Teams

Metric	Calculation	Result
Teams submitting monthly	~24 teams (from KHMS_Expected_Teams)	24
Time saved per team per month	30 min average	30 min
Total monthly time saved (submitters)	24 × 30 min	≈ 12 hours/month

Metric	Calculation	Result
Annual time saved (submitters)	12 hrs × 12 months	≈ 144 hours/year

Consolidation Time Saved (Previously Manual)

Activity	Old Process	New Process	Saved
Chasing missing submissions	2–3 hrs/month (emails, follow-ups)	5 min (View Tracker screen)	~ 2.5 hrs/month
Consolidating data from Excel files	3–5 hrs/month	0 (all auto-saved to one list)	~ 4 hrs/month
Cleaning/formatting data for dashboard	2–3 hrs/month	0 (structured SharePoint data)	~ 2.5 hrs/month
Total consolidation time saved	7–11 hrs/month	<15 min/month	≈ 9 hrs/month
Annual consolidation saving			≈ 108 hours/year

Combined Annual Time Saving – HC App

Submitters:	144 hours/year
Consolidation:	108 hours/year
TOTAL:	252 hours/year (~6.3 FTE weeks)

2. TIME SAVED – OpEx Survey App

Per Survey Completion

Activity	Old Process (MS Forms + manual tracking)	New App	Saved
Finding the correct form link	3 min	0 (app on home screen)	3 min
Filling in personal details	2 min	2 min (same)	0
Answering ~20 questions	10–15 min	8–12 min (structured dropdowns)	~3 min
Submission confirmation	None (no receipt)	Instant notification + SharePoint auto-save	Qualitative
Total per survey	15–20 min	10–14 min	~5 min saved

For Survey Administrators

Activity	Old Process	New App	Saved
Exporting Form results to Excel	20 min/cycle	0 (direct to SharePoint)	20 min
Matching Manager and Member responses	30–45 min manual	Instant (Role column auto-tagged)	35 min
Identifying non-respondents	45–60 min	Not yet in tracker (future scope)	TBD
Per survey cycle saving			~55 min

At Scale (50 Users)

Metric	Calculation	Result
Survey users	50 people (managers + members)	50
Time saved per person per survey	5 min	5 min
Survey cycles per year (estimated)	2–4 per year	3 average
Total user time saved per year	$50 \times 5 \text{ min} \times 3$	≈ 12.5 hours/year
Admin time saved per cycle	55 min	55 min

Metric	Calculation	Result
Admin total annual saving	55 min × 3 cycles	≈ 2.75 hours/year

3. ERROR REDUCTION

Error Type	Old Process	New App	Reduction
Wrong Tower/Team/Month in submission	Common (manual entry, copy-paste errors)	Impossible (dropdowns, auto-validation)	~ 100%
Score entered out of range (>100 or <0)	Not caught	App blocks submission with warning	100%
Missing questions in submission	Very common (spreadsheet rows skipped)	Blocked – cannot advance without all scores	~ 100%
Duplicate data from re-submissions	Frequent (multiple email versions)	Handled by RemoveIf logic in app	~ 100%
Wrong team assigned to wrong Tower	Occasional	Impossible – Team dropdown filters by Tower	100%

Error Type	Old Process	New App	Reduction
Survey answer to wrong role (Mgr/Mem)	Common	Role auto-tagged — no manual assignment	100%

4. DATA QUALITY IMPROVEMENTS

Metric	Before	After	Improvement
Structured data available for dashboards	No (Excel files, inconsistent formats)	Yes (SharePoint lists, consistent schema)	✓
Real-time visibility into submissions	No (email-based, weekly check)	Yes (Tracker screen, live)	✓
One consolidated data source	No (multiple Excel files per team)	Yes (single KHMS_HC_Responses list)	✓
Mandatory fields enforced	No (Excel could be submitted incomplete)	Yes (app blocks until all filled)	✓
Auto-populated metadata (Date, Tower, Pillar)	Manual entry required	Auto-populated from selections and reference list	✓

Metric	Before	After	Improvement
Historical data in one place	Scattered	All months in one SharePoint list	✓

5. REACH & SCALE

Metric	Value
Towers covered	11 (ATR, FP&A, GCO, GPS, DMO, PTP, SCM, TTC, PBS, Contact Center, Trade COE)
Teams/Regions covered	24+ teams across EU and NA
Functions using OpEx Survey	HR, Finance, Operations, IT, Legal, Supply Chain + others
Total app users (estimated)	50+ people
KHMS Tools assessed per submission	10 tools
Questions per full HC assessment	~50+ questions across all tools
Rows written to SharePoint per HC submission	~50 rows
Survey responses stored per cycle	~50 people × 20 questions = 1,000 rows/cycle

Metric	Value
SharePoint rows generated monthly (HC)	24 teams × 50 rows = 1,200 rows/month

6. PROCESS IMPROVEMENTS DELIVERED

#	Improvement	Impact
1	Wizard-based guided assessment	Users cannot skip steps – guaranteed completeness
2	Dependent Tower → Team dropdown	Eliminates team-tower mismatch errors entirely
3	Progress bar with step tracking	Users always know where they are in the process
4	Back button with answer preservation	Users can review and correct without losing data
5	Submission Tracker	Leadership can check compliance in real time, 0 effort
6	Reference list architecture	Questions/teams can be updated in SharePoint without rebuilding the app
7	Manager + Member survey separation	Distinct data collection per role, automatically tagged
8	Manager name linkage in member survey	Enables matched analysis of manager vs member perception

#	Improvement	Impact
9	Month format compatibility	Old abbreviated + new full month names both handled
10	Auto-chapter and pillar tagging	Eliminates manual metadata entry – pulled from reference list

7. BEFORE vs AFTER SUMMARY

BEFORE	AFTER
Excel files emailed monthly any device	→ Single Power App, any device
Manual consolidation (4+ hrs)	→ Auto-saved to SharePoint
No visibility on who submitted	→ Live Tracker screen
Manual error-checking validation – errors blocked	→ Built-in
Inconsistent data formats	→ Structured
Separate Form + export for HC wizard, no export needed	→ Integrated
No role differentiation separated automatically	→ Manager/Member
Chasing teams via email who's missing instantly	→ Tracker shows
Questions hardcoded in Excel	→ Dynamic from SharePoint reference list

8. ESTIMATED FINANCIAL IMPACT

Assuming an average blended hourly cost of ₹800/hour (GBS India context):

Category	Hours Saved/Year	Estimated Value
HC App – Submitter time	144 hrs	₹1,15,200
HC App – Consolidation time	108 hrs	₹86,400
Survey App – User time	12.5 hrs	₹10,000
Survey App – Admin time	2.75 hrs	₹2,200
Total Annual Estimated Value	267 hrs	≈ ₹2,13,800 (~\$2,550 USD)

Note: This does not account for value of improved data quality, faster dashboard reporting, reduced re-work from errors, or leadership time saved in follow-up – which would significantly increase the actual value delivered.

9. KEY NUMBERS AT A GLANCE

- 267 hours saved per year
- 50+ users across the organisation
- 11 towers covered
- 24+ teams submitting monthly
- 10 KHMS tools assessed per HC cycle
- 5 SharePoint lists built from scratch
- 2 Power Apps delivered
- 1 unified data source (no more scattered Excel

files)

0 manual emails needed to chase submissions
